Summary

Full-stack developer who designs systems and automates the work around them, with 5+ years building PHP web applications. As CTO at Syncro, I architected multi-tenant healthcare platforms now in production at **7 dental clinics**, and I bring AI into both the products — an LLM voice receptionist with tool calling, a booking chatbot — and the way I build them. Experienced in API, webhook and payment-gateway integrations, workflow automation, and Docker and Linux production deployments, working remotely for a US client.

Experience

SMB Solutions Remote · US client

Full-Stack Developer 2026

- Built a **B2B and B2C CRM** covering customer management, sales and operations workflows, developed AI-first with Lovable and wired to backend services and external APIs.
- Connected the CRM to **Zapier, PandaDoc and Notion** through APIs and webhooks, automating data sync, document workflows and process triggers that replaced manual operational work.

Syncro Davao City, Philippines

Chief Technology Officer / Full-Stack Developer 2023 – 2026

- Led architecture and development of healthcare platforms for **dental practice management and diagnostic imaging**; the dental platform runs at **7 clinics from one codebase**.
- Automated multi-client delivery with a **GitHub Actions** workflow that merges main into every clinic's branch, with a dry-run mode that checks for conflicts before pushing.
- Prototyped an **AI voice receptionist**: a LiveKit voice agent with Deepgram speech-to-text tuned on dental vocabulary and an **OpenAI model that calls the platform API as tools** to look up and manage appointments. Shipped a Dialogflow booking chatbot backed by a Laravel webhook.
- Designed **company-scoped data access, RBAC, a four-tier subscription system** with feature and usage limits, REST APIs, webhooks, and queued SMS and email campaigns (Twilio, Plivo).
- Ran production infrastructure on Linux VPS — deployments, Nginx, Supervisor queue workers, databases, domains and SSL.

Freelance Remote

Full-Stack Web Developer 2023 – Present

- Designed and built custom business, e-commerce and institutional web applications, from requirements to database-driven systems and automated workflows.
- Delivered and maintained production apps in **Laravel, PHP, Livewire, Next.js, MySQL, WordPress and JavaScript**, including payment-gateway and third-party integrations, deployment and server administration.

Projects

One Shot Imaging — Imaging Clinic Operations System

Laravel · Filament · Livewire · Laravel Reverb · MySQL · Multi-Tenancy

- Runs every visit at a dental-imaging clinic — registration, queueing, imaging, checkout and billing. **Live since October 2026**; multi-tenant version in development.
- Visit **state machine** kept in sync by model events, and **real-time** front-desk ↔ technician handoff over self-hosted Reverb WebSockets.
- BIR-compliant billing (VAT back-out, PWD/Senior 0% VAT, voids instead of deletes), four role-based Filament panels, an audit log of every financial write, and 60 test files.

BloodSeek — Blood Donation Mobile App & Admin Dashboard

React Native · Expo · Next.js · TypeScript · Supabase · Mapbox

- Android and iOS app for finding donation facilities and blood requests on a map, checking eligibility and booking a donation, with Google Sign-In and push notifications.
- Next.js staff console sharing the Supabase backend: donations, requests, drives and blood-component inventory, using Server Actions, TanStack Table and Recharts.

KLNW — Streetwear E-commerce Store

Next.js · TypeScript · Firebase · Cloudinary · Vercel

- Live storefront with cart and guest checkout, an admin CMS and revenue dashboard, and Firestore security rules separating public reads from admin-only writes. Built with an AI-assisted, pull-request-based workflow.

Skills

AI & AUTOMATION

OpenAI API, LLM Tool Calling, LiveKit Agents, Deepgram, Dialogflow, AI-Assisted Development, Lovable, Zapier, GitHub Actions

BACKEND & INTEGRATIONS

PHP, Laravel, Python, Livewire, Laravel Reverb, REST APIs, Webhooks, Queues, Payment Gateways, PandaDoc, Notion, Twilio

FRONTEND & MOBILE

Next.js, React, React Native, Expo, TypeScript, JavaScript, TALL Stack, Filament, AdminLTE

SYSTEM DESIGN & DATA

Multi-Tenancy, Database Design, State Machines, Real-Time / WebSockets, RBAC, MySQL, PostgreSQL, Supabase, Firebase

DEVOPS & INFRASTRUCTURE

Docker, Linux, Nginx, Apache, Supervisor, VPS Administration, aaPanel, Bash, Git

Education

Assumption College of Davao 2022 – 2026

BS Information Technology Graduated

Certifications

TOPCIT — Level 4 Certification of Proficiency
DICT — Certificate of Proficiency in Office Productivity
