Karl Daven P. Talib

Full-Stack Developer | AI, Automation & Integrations

pioloulo123@gmail.com +63 916 154 2709 Davao City, Philippines

Summary

Full-Stack Developer specializing in backend development, system architecture, API integrations, and multi-tenant applications. Experienced in building healthcare, CRM, and business platforms using Laravel, Filament, Livewire, Next.js, React, and Supabase, with hands-on experience in server-driven UI, webhooks, workflow automation, and relational database design. Also experienced in VPS administration, Linux infrastructure, deployment, and application operations.

Education

Assumption College of Davao Bachelor of Science

Information Technology 2022 – 2026

Experience

SMB Solutions Remote

Full-Stack Developer 2026 - 2026

- Developed CRM and business workflow features using **Lovable**, integrating application interfaces with backend services, APIs, and external platforms.
- Built and maintained automation workflows connecting business processes across **Zapier, PandaDoc, and Notion**, including data synchronization, document workflows, and automated process triggers.
- Implemented and troubleshot **API integrations and webhooks**, translating business requirements into connected application workflows and reducing manual operational processes.

Syncro Davao City, Philippines

Chief Technology Officer / Full-Stack Developer 2023 - 2026

- Lead the architecture and development of healthcare software platforms covering **dental practice management and diagnostic imaging operations**.
- Architected a **multi-tenant imaging diagnostics platform** using Laravel, TALL stack, and Filament, supporting patient journey management, operational workflows, analytics, and business insights.
- Designed backend architecture including **tenant-aware data access, relational database structures, authentication, authorization, RBAC, REST APIs, webhooks, and automated workflows**.
- Built **server-driven interfaces** using Laravel, Livewire, and Filament, keeping business logic, validation, authorization, and application state closely integrated with backend workflows.
- Managed VPS development infrastructure using **aaPanel**, including application deployment, server configuration, databases, domains, SSL, and supporting services.

Freelance Remote

Full-Stack Web Developer 2023 – Present

- Designed and developed custom business and institutional web applications, translating client requirements into complete database-driven systems and automated workflows.
- Built and maintained production applications across **Laravel, PHP, Livewire, MySQL, WordPress, and JavaScript**, while handling deployment, server administration, troubleshooting, and ongoing maintenance.

Projects

SMB Solutions CRM — B2B & B2C CRM Platform

Lovable · APIs · Webhooks · Zapier · PandaDoc · Notion · Workflow Automation

- Built a CRM platform supporting **B2B and B2C client workflows**, translating business requirements into customer management, sales, and operational processes.
- Integrated the CRM with **Zapier, PandaDoc, and Notion** through APIs, webhooks, and automated workflows to connect customer, document, and internal collaboration processes.

One Shot Imaging Diagnostics Platform

Laravel · TALL Stack · Filament · Livewire · MySQL · Multi-Tenancy

- Built a **multi-tenant imaging diagnostics platform** for managing patient journeys, diagnostic workflows, operational data, analytics, and business insights.
- Designed tenant-aware backend architecture, server-driven interfaces, relational data models, and API/webhook integrations to support organization-specific workflows.

Syncro Dental EHR & Practice Management

Laravel · PHP · AdminLTE · MySQL · Livewire · REST APIs · Webhooks · Multi-Tenancy

- Architected and developed a **multi-tenant SaaS platform for dental practices**, integrating patient management, digital intake, clinical records, imaging, treatment planning, scheduling, billing, and practice operations.
- Built and customized the application's **AdminLTE-based interface** with custom CSS and frontend components to deliver a tailored practice management experience.
- Designed backend architecture supporting **tenant isolation, role-based access control, multi-branch operations, REST APIs, webhooks, and automated workflows** across the platform.

Skills

BACKEND & APIs

PHP, Laravel, REST APIs, Webhooks, Livewire, Queues, RBAC

FRONTEND

Next.js, React, React Native, Expo, TypeScript, JavaScript, TALL Stack, AdminLTE, Filament

ARCHITECTURE & DATABASES

Multi-Tenant Architecture, Server-Driven UI, Database Design, MySQL, PostgreSQL, Supabase

INTEGRATIONS & AUTOMATION

Zapier, PandaDoc, Notion, Third-Party APIs, Workflow Automation

DEVOPS & INFRASTRUCTURE

Linux, Nginx, aaPanel, VPS Administration, Apache, Bash, Git

Certifications

Level 4 Certification of Proficiency
TOPCIT
